NOTIFICATION OF PROPOSED RESEARCH CRUISE

PART B : GENERAL

1. NAME OF RESEARCH SHIP: ***TRIDENS*** CRUISE NO: **WK. 11 - 13**

2. DATES OF CRUISE FROM ***13 March 2006*** **TO** ***31 march 2006***

3. a) PURPOSE OF RESEARCH ***Estimate the spawning stock abundance of Blue Whiting using acoustic methods.***

   b) GENERAL OPRATIONAL METHODS (including full description of any fishing geartrawl type, mesh size etc:)
   A pelagic trawl (2000 meshes), fitted out with an inner codend of 20 mm meshes, will be used for identifying the traces.

   For the calibration the ship has to be anchored in a sheltered location, and the 38 kHz transducer will be calibrated with the aid of a small copper sphere that is lowered below the keel of the ship. For the calibration of a second 38 kHz transducer which is build in a towed body, the towed body (2,5 x 1 m; 300 kg; stainless steel) has be lowered a few meters below the surface. The entire operation will not take more than 6 hours. A CTD profile will be taken at the calibration site. No fishing will be conducted, and no other electronic instruments than the normal 38 kHz echosounder and the CTD will be operated.

4. ATTACH CHART showing (on an appropriate scale) the geographical area of the intended work, positions od intended stations, tracks of survey lines, positions of moored/seabed equipment, areas to be fished:

5. a) TYPES OF SAMPLES REQUIRED eg Geological/Water/Plankton/Fish/Radionuclide:
