# NOTIFICATION OF PROPOSED RESEARCH CRUISE

## PART B: DETAIL

1. *NAME OF RESEARCH SHIP* MG-1365 Smolensk *CRUISE NO.* 02/03
2. *DATES OF CRUISE* From: 10/03/2003 To: 05/05/2003  
including the British Economic Zone from 25/03/03 to 02/05/03

3. a) *PURPOSE OF RESEARCH*

Trawl-acoustic survey on blue whiting and mackerel stocks; oceanographic survey to the west of the British Isles to develop the long-term co-operation within the framework of ICES.

b) *GENERAL OPERATIONAL METHODS*

(including full description of any fishing gear trawl type, mesh size, etc.)

Fish distribution will be investigated with acoustic devices. Check trawlings will be made by mid-water trawl with a mesh size of 16 mm in the bag. Oceanographic observations including water temperature and salinity measurements, as well as hydrochemical investigations, will be carried out at stations of standard oceanographic sections and at trawl stations.

4. *ATTACH CHART*

(showing (on an appropriate scale) the geographical area of the intended work, positions of intended stations, tracks of survey lines, positions of moored/seabed equipment, areas to be fished)

Chart is attached

5. a) *TYPES OF SAMPLES REQUIRED*

(e.g. Geological/Water/Plankton/Fish/Radionuclide)

Fish catches taken by mid-water trawl for full biological analysis. Water samples for hydrochemical analysis.

b) *METHODS OF OBTAINING SAMPLES*

(e.g. dredging/coring/drilling/fishing, etc.)

(When using fishing gear, indicate fish stocks being worked, quantity of each species required, quantify of fish to be retained on board)

Observations will be made when the vessel is sailing or drifting. No ground samples will be taken. Catches will be taken by midwater trawl. Stocks of blue whiting, mackerel and other pelagic and bottom fish will be worked. In the course of investigations 100 tonnes of blue whiting are expected to be taken. By-catch of other fish species may constitute up to 50% of the blue whiting catch.

6. *DETAILS OF MOORED EQUIPMENT*

No moored equipment will be used.

<u>Laying</u>	<u>Recovery</u>	<u>Description</u>	<u>Depth</u>	<u>Latitude</u>	<u>Longitude</u>
